The scheme often broke down marks into levels or bands, with detailed descriptors for each level, guiding examiners in consistent grading.

Deep Dive into Key Sections of the 2006 Markscheme

Cell Biology and Microscopy

Sample Question (2006): "Describe how an electron microscope differs from a light microscope."

Markscheme Highlights:

- Electron microscopes use electrons instead of light (1 mark)
- Higher resolution and magnification (1 mark)
- Greater detail of cell structures (1 mark)

Educational Implication: The mark scheme rewarded specific differences, emphasizing understanding beyond superficial features. It encouraged students to describe both technical and functional distinctions.

Biological Molecules and Enzymes

Sample Question: "Explain how enzymes catalyze chemical reactions."

Markscheme Highlights:

- Enzymes lower activation energy (1 mark)
- Active site binds substrate (1 mark)

- Enzyme specificity (1 mark)
- Enzymes are not consumed in the reaction (1 mark)
